

**REMARKS**

In accordance with MPEP § 714.16(d) III, Applicant respectfully requests a waiver of 37 C.F.R. 1.312, and further respectfully requests that the Examiner enter the foregoing amendment. The amendment provides a description of Figures 9a, 9b, 10a, 10b, 11a, 12a, 12b, 12c, and 12d as requested in the Notice and in a manner consistent with 37 CFR § 1.121 and MPEP § 714. The new drawings are virtually identical to corresponding drawings in the related Provisional Patent Application, except for a renumbering of the figures. Therefore, this amendment does not include any new matter, raise any new issues, or require any further search or consideration by the Examiner. Accordingly, Applicant submits that the amendment complies with Patent Office rules and requests entry thereof in the present application prior to publication of the patent grant.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'W. Scott Petty', is written over a faint, larger signature.

W. Scott Petty
